Kristine,

It is our understanding that you have been tasked to develop a draft stormwater proposal for the stormwater tech team to review. As you know, the tech team has been working on a draft matrix of the various DQOs and objectives, and the possible sampling methodologies that may be employed to answer the DQOs. Attached please find the latest draft of this matrix (it would have been sent to you from one of our tech folks, but they were all booked today so it fell on me!). The DQOs and objectives for the harborwide RI/FS and the DEQ source control program reflect those discussed during the November 4, 2006, Management Team meeting. We did not include the objectives for the work being conducted under the DEQ/City of Portland IGA (although they are essentially the same except for the addition of "source tracing and control").

We are hoping this draft matrix will be useful to you as you pull together your proposal. Please feel free to contact any of the members of the tech team for clarification and/or questions.
